sents the direct express movement of funds and the operations of the banks with the local sub-Freasury. The banks received direct by express \$4.284.300, and shipped \$633,600, a gain on the movement of \$3.343,300. The banks lost to the Sub-Freasury \$2,191,000. The Sub-Freasury statement covers disbursements for bonds purchased to the extent of \$631,744, gold shipped amounting to \$2,200,305, and about \$400,000 disbursed here on account of San Francisco and Seattle credits, for gold received from the Klondike. Bank officials say that there are a number of conflicting local movements of money, including preparations for the July disbursements, which preclude a reasonably safe forecast of to-morrow's bank statement. The statement will be made up on declining averages. The situation is all the more complicated because of reports that large loans have been paid off. The general impression is that the statement will show an increase in loans and a decrease in surplus reserves, although conjecture enters largely into the subject this week."
